Contents of Volume 102

Number 1, 7 May 1983

ROGATKO, A., Diallelic Model Combining Selection and Incomplete Penetrance 1

PEUSNER, L., Hierarchies of Irreversible Energy Conversion Systems: A Network Thermodynamic Approach. I. Linear Steady State Without Storage 7

PETERSON, J. A., The Widespread Nature of Phenotypic Variability in Hepatomas and Cell Lines, in the Form of a Geometric Series 41

BERTUZZI, A., GANDOLFI, A., GERMANI, A. and VITELLI, R., A General Expression for Sequential DNA-fluorescence Histograms 55

MONOI, H., Ionic Interactions and Anion Binding in the Gramicidin Channel. An Electrostatic Calculation 69

BREMER, H. and CHUANG, L., Cell Division in *Escherichia coli* after Changes in the Velocity of DNA Replication 101

CHARTON, M. and CHARTON, B. I., The Dependence of the Chou–Fasman Parameters on Amino Acid Side Chain Structure . 121

CALDER, W. A. III, Body Size, Mortality and Longevity . . 135

BLAKE, J. R., VANN, P. G. and WINET, H., A Model of Ovum Transport 145

LETTER TO THE EDITOR

KIKUCHI, T. and MISHIMOTO, K., Theoretical Studies of Hemoproteins. III. Dynamical Treatment of Some Abnormal Hemoglobins 167

Number 2, 21 May 1983

NORWICH, K. H., To Perceive is to Doubt: The Relativity of Perception 175

ANNINOS, P. and ARGYRAKIS, P., A Mathematical Model for the Decay of Short-term Memory with Age 191

RICHARDSON, I. W. and LOUIE, A. H., Projections as Representations of Phenomena 199

LEFEVRE, J., Teleonomical Optimization of a Fractal Model of the Pulmonary Arterial Bed 225

LATIMER, P., Photometric Assays of Cell Shrinkage—The Resolution of a Conflict 249

VILU, R., Calculation of Probabilities of Random Occurrence of Different Types of Palindromes 261

ISHAY, J. S., PANIRY, V. and SADEH, D., Direction Finding by Hornets in a Vertically Rotating Centrifuge 269

SAXENA, V. P., Temperature Distribution in Human Skin and Subdermal Tissues 277

SIVAKAMI, S. and SRINIVASAN, V., A Model for Memory . . 287

POKORNÝ, J., JANDOVÁ, A., HEYBERGER, K., KOBILKOVÁ, J. and HRABA, T., Fröhlich Electromagnetic Radiation from Human Leukocytes: Implications for Leukocyte Adherence Inhibition Test 295

DELISI, C. and WIEGEL, F. W., Membrane Fluidity and the Probability of Complement Fixation 307

MOHAMMAD, S. N., HOPFINGER, A. J. and BICKERS, D. R., Intrinsic Mutagenicity of Polycyclic Aromatic Hydrocarbons: A Quantitative Structure Activity Study Based upon Molecular Shape Analysis 323

LETTERS TO THE EDITOR

TROQUET, J., Solutions Versus Diffusion at the Alveolar Lining in the Lung 333

DIX, D., Toward a Definition of Life: Semantic and Thermodynamic Considerations 337

Number 3, 7 June 1983

TREISMAN, M., Errors in the Theory of the Structured Deme . 339

IBERALL, A. S., What is "Language" that can Facilitate the Flow of Information? A Contribution to a Fundamental Theory of Language and Communication 347

SOLOWAY, A. H., BRUMBAUGH, R. J. and WITIAK, D. T., Carbinolamines and Related Structures—Potential Alkylating Metabolites of Clinically Active Anticancer Drugs . . . 361

BERGMAN, M. O., Mathematical Model for Contact Inhibited Cell Division 375

ENQUIST, M. and LEIMAR, O., Evolution of Fighting Behaviour: Decision Rules and Assessment of Relative Strength . . 387

FERRIER, J., A Mechanism for the Regulation of Ligament Width Based on the Resonance Frequency of Ion Concentration Waves 477

COLLIER, I. E., OLSON, W. H. and REGAN, J. D., A Mechanism for the Control of Patch Size in Mammalian Cell DNA Excision Repair 487

KING, S. M., A Regulatory Model for Spindle Function During Mitosis 501

IMAMURA, A. and OHSAKU, M., A Molecular Orbital Treatment on the Reactivity of Some Polycyclic Aromatic Hydrocarbon Diol-Epoxides 511

DUFTON, M. J., The Significance of Redundancy in the Genetic Code 521

SIBLY, R. and CALOW, P., An Integrated Approach to Life-cycle Evolution using Selective Landscapes 527

GRAFEN, A. and RIDLEY, M., A Model of Mate Guarding . . 549

MULLER-HEROLD, U., What is a Hypercycle? 569

MIYAMOTO, Y., HANANO, M., IGA, T. and ISHIKAWA, M., Concentration Profile in the Intestinal Tract and Drug Absorption Model: Two-dimensional Laminar Flow in a Circular Porous Tube . 585

BLUTE, M., "Selfish" DNA and Differential Parental Investment: Some Implications for Sex Chromosomes 603

CORBEN, H. C., Wing-beat Frequencies, Wing-areas and Masses of Flying Insects and Hummingbirds 611

LETTER TO THE EDITOR

ZNOJIL, V., An Ignored Error in the Mathematical Formulation of Erythrocyte Survival Curves 625

Index to Volume 102

Adsorption, sequential, random, simulation of; efficient methods and resolution of conflicting results, 439
Age, a mathematical model for the decay of short-term memory with, 191
Alveolar lining in the lung, solutions versus diffusion at (letter), 331
Amino acid side chain structure, the dependence of the Chou-Fasman parameters on, 121
Anion binding and ionic interactions in the gramicidin channel; an electrostatic calculation, 69
ANNINOS, P. and ARGYRAKIS, P., A mathematical model for the decay of short-term memory with age, 191
Antibody incidence structure; mathematical immunogenetics, 425
Anticancer drugs, clinically active, potential alkylating metabolites of; carbinolamines and related structures, 361
ARGYRAKIS, P. (see ANNINOS, P.), 191
ATP-analogs, the inactivation of $(Na^+ + K^+)$-ATPase and Ca^{2+}-ATPase by; analysis of biphasic time courses, 469

BERGMAN, M. O., Mathematical model for contact inhibited cell division, 375
BERTUZZI, A., GANDOLFI, A., GERMANI, A. and VITELLI, R., A general expression for sequential DNA-fluorescence histograms, 55
BICKERS, D. R. (see MOHAMMAD, S. N.), 321
Biology, on the role of chance in; the stochastic continuum (letter), 463
Biphasic time courses: the inactivation of $(Na^+ + K^+)$-ATPase and Ca^{2+}-ATPase by ATP-analogs, 469
BLAKE, J. R., VANN, P. G. and WINET, H., A model of ovum transport, 145
BLUTE, M., "Selfish" DNA and differential parental investment: some implications for sex chromosomes, 603
Body size, mortality and longevity, 135
BREMER, H. and CHUANG, L., Cell division in *Escherichia coli* after changes in the velocity of DNA replication, 101
BRUMBAUGH, R. J. (see SOLOWAY, A. H.), 361

Ca^{2+}-ATPase and $(Na^+ + K^+)$-ATPase, the ATP-analog inactivation of; analysis of biphasic time courses, 469
CALDER, W. A. III., Body size, mortality and longevity, 135
CALOW, P. (see SIBLY, R.), 527
Carbinolamines and related structures—potential alkylating metabolites of clinically active anticancer drugs, 361
Cell division, contact inhibited, mathematical model for, 375
Cell division in *Escherichia coli* after changes in the velocity of DNA replication, 101
Cell DNA excision repair, mammalian, a mechanism for the control of patch size in, 487

Cell lines, the widespread nature of phenotypic variability in hepatomas and, in the form of a geometric series, 41
Cell shrinkage, photometric assays of; the resolution of a conflict, 249
Centrifuge, vertically rotating, direction finding by hornets in, 269
Chance in biology, the role of; the stochastic-deterministic continuum (letter), 463
CHARTON, B. I. (see CHARTON, M.), 121
CHARTON, M. and CHARTON, B. I., The dependence of the Chou-Fasman parameters on amino acid side chain structure, 121
Chou-Fasman parameters, their dependence on amino acid side chain structure, 121
Chromosomes, sex, some implications for; "selfish" DNA and differential parental investment, 603
CHUANG, L. (see BREMER, H.), 101
COLLIER, I. E., OLSON, W. H. and REGAN, J. D., A mechanism for the control of patch size in mammalian cell DNA excision repair, 487
Communication and language, a contribution to a fundamental theory of; what is "language" that can facilitate the flow of information?, 347
Complement fixation, membrane fluidity and the probability of, 305
Concentration profile in the intestinal tract and drug absorption model: two-dimensional laminar flow in a circular porous tube, 585
Contact inhibited cell division, mathematical model for, 375
CORBEN, H. C., Wing-beat frequencies, wing-areas and masses of flying insects and hummingbirds, 611

DELISI, and WIEGEL, F. W., Membrane fluidity and the probability of complement fixation, 305
Deme, structured, errors in the theory of, 339
Deterministic-stochastic continuum; the role of chance in biology (letter), 463
Diallelic model combining selection and incomplete penetrance, 1
Diffusion versus solutions at the alveolar lining in the lung (letter), 331
Diol-epoxides, hydrocarbon, aromatic, polycyclic, a molecular orbital treatment on the reactivity of, 511
Direction finding by hornets in a vertically rotating centrifuge, 269
DIX, D., Toward a definition of life: semantic and thermodynamic considerations (letter), 335
DNA excision repair, mammalian cell, a mechanism for the control of patch size in, 487
DNA-fluorescence histograms, sequential, a general expression for, 55
DNA replication, cell division in *Escherichia coli* after changes in the velocity of, 101
DNA, "selfish", and differential parental investment: some implications for sex chromosomes, 603
Drug absorption model, concentration profile in the intestinal tract and; two-dimensional laminar flow in a circular porous tube, 585
Drugs, anticancer, clinically active, potential alkylating metabolites of; carbinolamines and related structures, 361
DUFTON, M. J., The significance of redundancy in the genetic code, 521
Dynamical treatment of some abnormal hemoglobins; theoretical studies of hemoproteins (letter), 167

Electromagnetic radiation, Fröhlich, from human leukocytes; implications for leukocyte adherence inhibition test, 293
Electrostatic calculation of ionic interactions and anion binding in the gramicidin channel, 69
Energy conversion systems, irreversible, hierarchies of; a network thermodynamic approach; linear steady state without storage, 7
ENQUIST, M. and LEIMAR, O., Evolution of fighting behaviour: decision rules and assessment of relative strength, 387
Erythrocyte survival curves, an ignored error in the mathematical formulation of (letter), 625
Escherichia coli cell division after changes in the velocity of DNA replication, 101
Evolution of fighting behaviour: decision rules and assessment of relative strength, 387
Evolution, life-cycle, an integrated approach using selective landscapes, 527
Evolutionary advantage conferred by sex, 447

FERRIER, J., A mechanism for the regulation of ligament width based on the resonance frequency of ion concentration waves, 477
Fighting behaviour, evolution of; decision rules and assessment of relative strength, 387
Fluidity, membrane, and the probability of complement fixation, 305
Fluorescence: a general expression for sequential DNA-fluorescence histograms, 55
Flying insects and hummingbirds, wing-beat frequencies, wing-areas and masses of, 611
Fractal model of the pulmonary arterial bed, teleonomical optimization of, 225
FRITZSCH, G. and KOEPSELL, H., An analysis of biphasic time courses: the inactivation of $(Na^+ + K^+)$-ATPase and Ca^{2+}-ATPase by ATP-analogs, 469
Fröhlich electromagnetic radiation from human leukocytes: implications for leukocyte adherence inhibition test, 293

GANDOLFI, A. (see BERTUZZI, A.), 55
Genetic code, the significance of redundancy in, 521
GERMANI, A. (see BERTUZZI, A.), 55
GLASSER, J. W. and WIEGERT, R. G., On the role of chance in biology: the stochastic-deterministic continuum (letter), 463
GRAFEN, A. and RIDLEY, M., A model of mate guarding, 549
Gramicidin channel, ionic interactions and anion binding in; an electrostatic calculation, 69
GRIFFIN, M., How much evolutionary advantage does sex confer?, 447
Guarding, mate, a model of, 549

HANANO, M. (see MIYAMOTO, Y.), 585
Hemoglobins, abnormal, dynamical treatment of; theoretical studies of hemoproteins (letter), 167
Hemoproteins, theoretical studies of; dynamical treatment of some abnormal hemoglobins (letter), 167
Hepatomas and cell lines, the widespread nature of phenotypic variability in, in the form of a geometric series, 41
HEYBERGER, K. (see POKORNÝ, J.), 293

Hierarchies of irreversible energy conversion systems: a network thermodynamic approach. Linear steady state without storage, 7
HOPFINGER, A. J. (see MOHAMMAD, S. N.), 321
Hornets, direction finding by, in a vertically rotating centrifuge, 269
HRABA, T. (see POKORNÝ, J.), 293
Human leukocytes, Fröhlich electromagnetic radiation from; implications for leukocyte adherence inhibition test, 293
Human skin and subdermal tissues, temperature distribution in, 277
Hummingbirds and flying insects, wing-beat frequencies, wing-areas and masses of, 611
Hypercycle, what is a?, 569

IBERALL, A. S., What is "language" that can facilitate the flow of information? A contribution to a fundamental theory of language and communication, 347
IGA, T. (see MIYAMOTO, Y.), 585
IMAMURA, A. and OHSAKU, M., A molecular orbital treatment on the reactivity of some polycyclic aromatic hydrocarbon diol-epoxides, 511
Immunogenetics, mathematical; antibody incidence structure, 425
Immunogenetics, mathematical; mathematics as language, 411
Information, what is "language" that can facilitate the flow of?; a contribution to a fundamental theory of language and communication, 347
Intestinal tract and drug absorption model, concentration profile in; two-dimensional laminar flow in a circular porous tube, 585
Ion concentration waves, a mechanism for the regulation of ligament width based on the resonance frequency of, 477
Ionic interactions and anion binding in the gramicidin channel; an electrostatic calculation, 69
ISHAY, J. S., PANIRY, V. and SADEH, D., Direction finding by hornets in a vertically rotating centrifuge, 269
ISHIKAWA, M. (see MIYAMOTO, Y.), 585

JODREY, W. S. (see TORY, E. M.), 439

KIKUCHI, T. and MISHIMOTO, K., Theoretical studies of hemoproteins. III. Dynamical treatment of some abnormal hemoglobins (letter), 167
KING, S. M., A regulatory model for spindle function during mitosis, 501
KOBILKOVÁ, J. (see POKORNÝ, J.), 293
KOEPSELL, H. (see FRITZSCH, G.), 469

Laminar flow, two-dimensional, in a circular porous tube; concentration profile in the intestinal tract and drug absorption model, 585
Landscapes, selective, an integrated approach to life-cycle evolution using, 527
Language and communication, a contribution to a fundamental theory of; what is "language" that can facilitate the flow of information?, 347
Language, mathematics as; mathematical immunogenetics, 411
LATIMER, P., Photometric assays of cell shrinkage—the resolution of a conflict, 249
LEFEVRE, J., Teleonomical optimization of a fractal model of the pulmonary arterial bed, 225

LEIMAR, O. (see ENQUIST, M.), 387
Leukocytes, human, Fröhlich electromagnetic radiation from; implications for leukocyte adherence inhibition test, 291
Life, toward a definition of; semantic and thermodynamic considerations (letter), 335
Life-cycle evolution, an integrated approach using selective landscapes, 527
Ligament width regulation, a mechanism based on the resonance frequency of ion concentration waves, 477
Longevity, mortality and body size, 135
LOUIE, A. H. (see RICHARDSON, I. W.), 199
Lung, solutions versus diffusion at the alveolar lining in (letter), 331

Mammalian cell DNA excision repair, a mechanism for the control of patch size in, 487
MARKOWSKY, G. and WOHLGEMUTH A., Mathematical immunogenetics II. Antibody incidence structure, 425
MARKOWSKY, G. (see WOHLGEMUTH, A.), 411
Mate guarding, a model of, 549
Mathematical immunogenetics; antibody incidence structure, 425
Mathematical immunogenetics; mathematics as language, 411
Membrane fluidity and the probability of complement fixation, 305
Memory, a model for, 285
Memory, short-term, decay with age, a mathematical model for, 191
MISHIMOTO, K. (see KIKUCHI, T.), 167
Mitosis, a regulatory model for spindle function during, 501
MIYAMOTO, Y., HANANO, M., IGA, T. and ISHIKAWA, M., Concentration profile in the intestinal tract and drug absorption model: two-dimensional laminar flow in a circular porous tube, 585

Molecular orbital treatment on the reactivity of some polycyclic aromatic hydrocarbon diol-epoxides, 511
MONOI, H., Ionic interactions and anion binding in the gramicidin channel. An electrostatic calculation, 69
Mortality, longevity and body size, 135
MULLER-HEROLD, U., What is a hypercycle?, 569
Mutagenicity, intrinsic, of polycyclic aromatic hydrocarbons: a quantitative structure activity based upon molecular shape analysis, 321

Network thermodynamic approach to hierarchies of irreversible energy conversion systems; linear steady state without storage, 7
NORWICH, K. H., To perceive is to doubt: the relativity of perception, 175

OHSAKU, M. (see IMAMURA, A.), 511
OLSON, W. H. (see COLLIER, I.E.), 487
Ovum transport, a model of, 145

Palindromes, calculation of probabilities of random occurrence of different types of, 261
PANIRY, V. (see ISHAY, J. S.), 269
Parental investment, differential, and "selfish" DNA; some implications for sex chromosomes, 603
Patch size in mammalian cell DNA excision repair, a mechanism for the control of, 487
Penetrance, incomplete, and selection combined in diallelic model, 1
Perception, the relativity of; to perceive is to doubt, 175
PETERSON, J. A., The widespread nature of phenotypic variability in hepatomas and cell lines, in the form of a geometric series, 41
PEUSNER, L., Hierarchies of irreversible energy conversion systems: a network thermodynamic approach. I. Linear steady state without storage, 7
Phenomena, projections as representations of, 199
Phenotypic variability in hepatomas and cell lines, in the form of a geometric series, the widespread nature of, 41
Photometric assays of cell shrinkage; the resolution of a conflict, 249
PICKARD, D. K. (see TORY, E. M.), 439
POKORNÝ, J., JANDOVÁ, A., HEYBERGER, K., KOBILKOVÁ, J. and HRABA, T., Fröhlich electromagnetic radiation from human leukocytes: implications for leukocyte adherence inhibition test, 293
Polycyclic aromatic hydrocarbon diol-epoxides, a molecular orbital treatment on the reactivity of, 511
Polycyclic aromatic hydrocarbons, intrinsic mutagenicity of; a quantitative structure activity study based upon molecular shape analysis, 321
Projections as representations of phenomena, 199
Pulmonary arterial bed, teleonomical optimization of a fractal model of, 225

Random occurrence of different types of palindromes, calculation of probabilities of, 261
Random sequential adsorption simulation: efficient methods and resolution of conflicting results, 439
Reactivity of some polycyclic aromatic hydrocarbon diol-epoxides, a molecular orbital treatment on, 511
Redundancy in the genetic code, the significance of, 521
REGAN, J. D. (see COLLIER, I. E.), 487
Regulation of ligament width, a mechanism based on the resonance frequency of ion concentration waves, 477
Regulatory model for spindle function during mitosis, 501
Relativity of perception; to perceive is to doubt, 175
Resonance frequency of ion concentration waves, a mechanism for the regulation of ligament width based on, 477
